

PORTA-VAC®

Portable, Gas Engine-Powered Vacuum

The Industry's First And Most Popular Engine-Driven Portable Vacuum

The Porta-Vac by **Wm. W. Meyer & Sons, Inc.**, introduced in 1990, is a very practical and profitable combination of power and portability. More powerful than electric vacuums with its 20 hp gasoline engine, the Meyer Porta-Vac is also more mobile than traditional truck and trailer-mounted units. It can be transported to a job site, then wheeled to a convenient location at the building's exterior.

Using shorter, more efficient hose runs and an external filter bag, the Porta-Vac offers "near truck mount" performance at a fraction of the cost. With its hybrid advantages and economical price, the Porta-Vac is an ideal choice for entry-level duct cleaning contractors and experienced veterans.

Porta-Vac Features And Advantages At A Glance

- 20 hp Kohler Command OHV gasoline engine.
- Inlet/discharge safety guards.
- Exhaust safety shield.
- Remote mounted oil filter.
- Oil drain extension with quick-change valve.
- Oil Sentry safety switch.
- Removable, two-position padded handle.
- High-impact battery box.
- Pneumatic wheels: 2 stationary, 2 swivel w/locks.
- High-efficiency Dacron® filter bag.
- Dynamically and statically balanced, material handling fan wheel.
- Two-year warranty.
